

To whom it may concern: I wish it known that I am a frequent listener to KLOVE radio (90.7 and 90.3 in the Minneapolis metro area) and am concerned that the introduction of Low Power FM in our area may result in the disappearance of the KLOVE FM translator associated with receiving KLOVE radio in our area. I am a daily listener of KLOVE and consider it an important part of my daily radio listening habits. In an era when it is difficult to find anything of value to either hear or watch on our radio and TV air waves, KLOVE is a refreshing breath of fresh air. Loss of it to our community can have nothing but deleterious effects. Please consider this as you contemplate the licensing of LPFM.

Sincerely.

Ed Sorgatz
